SAUERBURGER

Comfortable mowing with simple technology

After mowing your field or pasture land there are always areas around fences and trees that need to be reworked. The specially designed Itlis from SAUERBURGER enable you to get to these areas without the need to walk around the whole field with a strimmer. With Itlis you can now do it from the comfort of your tractor. The grass is mulched into a good decomposable product that is spread evenly out from the back of the mowing head. Itlis is built with simplicity in mind, increasing the reliability and reducing downtime.

With its heavy duty light running drive train Itlis can be used on tractors from 22Kw upwards with a CAT 1 or 2 mounting system. On request Itlis can also be front mounted. During the design phase extra attention was paid to the weight of the mowing head in order to keep the swinging mass down to a minimum. Attention was also paid to the height of the mowing head to ensure that you can mow underneath the lowest fences. The SAUERBURGER design team has managed to keep spring tensioner ensures the mowing head follows the contour of the ground. The return spring for the mowing head can also be adjusted to suit the obstacle that must be mowed around eg. light enough to mow around young fruit trees or light fence posts or strong enough to get through the thickest undergrowth and larger trees and posts. With the hydraulically adjustable dolly wheel, the cutting height can be comfortably adjusted to suit all terrains.

Standard features:

- 90 cm diameter mowing head
- Slide plate under cutting knives
- Low slung cover on mowing head
- Swinging dolly wheel on the left
- Hyd. adjustable dolly wheel on the right
- Mechanical transport lock-off
- CAT 1 or 2 mounting
- Storage stand
- Reach from middle of tractor, 2.10 M

Optional extras:

- PTO shaft with slip clutch
- Hydraulic retractor for transport
- CAT I and II mounting
- Hydraulic drive
- Yard Loader mounting Euro 8

Large swing reach, Hyd. height adjustment, spring tensioner

Low mowing head enables mowing under low fences

Slide plate under the knives minimizes damage to the grass roots

Type	Swing reach	Weight kg
ILTIS	1,20 - 2,00	250
