PASTURE CARE IS IMPORTANT

Your pastures will look much better after grazing when mowed with LEO.

In a single pass LEO will mow, mulch and distribute cow pats.

The grass and weeds that the livestock leave behind are chopped and distributed, accelerating the decomposition and humification. The quick decomposition reduces re-growth of weeds and unwanted plants. LEO helps create a regular even growth of the grass after mowing.

Leo with rear roller

STANDARD FEATURES

- Side shift to the right
- Quick-connect lower linkage
- Strengthened steel housing
- Wide side skids with height adjustment
- 3 rotors with belt drive
- Easy opening drive belt covers
- Power belt tensioner
- Skid plate under the middle rotor
- Large over-cut between the rotors
- Rotor blades with wings
- Heavy duty gearbox
- Rear chain guard

Swinging blades and skid plate under the middle rotor are standard

The belt covers can be opened without the need for tools allowing easy maintenance and cleaning.

Type	Total width m	Working width m	Length m	Weight kg
LEO 3000	3,00	2,80	1,40	540

OPTIONAL EXTRAS

- PTO shaft
- PTO shaft with free-wheeling
- Double action hydraulic cylinder for side shift
- Rear roller
